DETAILED ACTION

Claims 1-37 are currently presented in the instant application according to the Applicants' filing on 09/17/2003.

Allowable Subject Matter

1. Claims 1-37 are allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The closest prior art fails to disclose or fairly suggest

- A reconfigure filter including a reverse gain stage configured to provide an offset control signal based on a reverse control signal and an output signal and configuration of bandwidth and the frequency offset allows the reconfigurable filter to realize a desired filter pole, as called for in claim 1; or

- A method for providing a reconfigurable filter comprising the step of amplifying an output signal based on a reverse gain control signal, thereby providing an offset control signal, in which the configuration of bandwidth and the frequency offset allows the reconfigurable filter to realize a desired filter pole, as called for in claim 17; or

- A reconfiguration N^{th} order filter including, each of the reconfigurable filters including a reverse gain stage configured to provide an offset control signal based on a reverse gain control signal and an output signal, in which the number N corresponds to a number of poles realized by the N^{th} order filter and configuration of the bandwidth and the frequency offset of each of the reconfigurable filters allows each of the reconfigurable filters to realize a desired filter pole, as called for in claim 32.
